

Colorado Summit on Pediatric Home Asthma Interventions

Children's Hospital Colorado
August 28, 2014

Martin Nee

Division Director

Regional Management and Technical Support Division

Office of Lead Hazard Control and Healthy Homes

U.S. Department of Housing and Urban Development

Goals for the Summit

- Create a baseline understanding of in-home asthma interventions
- Hear information on the costs and benefits of incorporating home assessments in an asthma program
- Learn best practices from model asthma programs who are addressing environmental hazards
- Identify next steps to establish a sustainable model of reimbursement for children's home asthma interventions in Colorado

Current Approaches to Reimbursement

Cleveland

Michigan

Lessons Learned from Past Summits

- There is growing national interest in expanding reimbursement
- Every state has unique challenges
- Effective collaboration between federal, state, and local agencies and organizations is imperative
- There is an evidence-base supporting the importance of home-based assessments, interventions, and education in comprehensive asthma care

Next Steps

- Take today's output and continue the momentum
- Strengthen the necessary partnerships
- Identify challenges to establishing a sustainable reimbursement system and start working to overcome them
