

## SYSTEM FOR ASTHMA CONTROL PROGRAM SUSTAINABILITY

The *System for Asthma Control Program Sustainability* consists of key elements tied to the emergence of promising asthma programs; the effective use of evaluation data; the recruitment and institutionalization of resources to support the program; and, the continuous improvement and expansion of asthma care delivery.

After hearing about the System and the goals that high-performing programs are able to achieve when they apply the *System for Asthma Control Program Sustainability*, write down your organization's bold goals in the space below. Identify the short and longer-term actions you will take to build, evaluate, and resource your own System to advance your community's progress toward your bold goals. Think about and record who you need to connect with in your community to ensure your success.

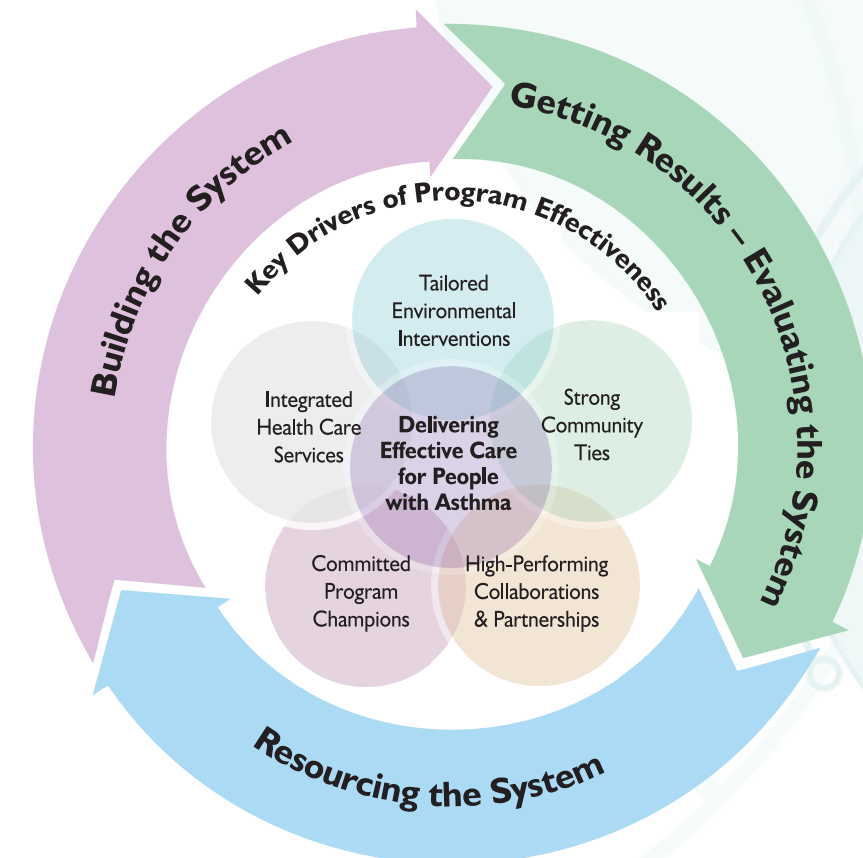

<b>Bold Goals (What will you achieve?):</b>				
	<b>I. Actions – Short term (In the next year)</b>		<b>II. Actions – Longer Term (1-5 years)</b>	
	<b>Actions–</b> Steps to reach your goal	<b>Connections–</b> People and organizations that can support you	<b>Actions–</b> Steps to reach your goal	<b>Connections–</b> People and organizations that can support you
<b>Building the System</b>				
<b>Getting Results – Evaluating the System</b>				
<b>Resourcing the System</b>				

## Attendee Worksheet May 31 – June 1, 2007

Welcome! Over the next two days, you will learn about the *System for Asthma Control Sustainability*—including the *Key Drivers of Program Effectiveness*, participate in interactive sessions, and share your experiences with communities from across the country. This worksheet serves as a tool to facilitate your participation in the Forum to help you identify your next steps for action in your community.

### A Systems-Based Approach for Creating & Sustaining Effective Community Asthma Programs
